Unit 1

1. Introduction to AI

RCV Academy

Module 1.2

1.2 Narrow, General and Super AI

Tutorial 1.2

1.2 Narrow, General and Super AI

AI-1.2.1 K2 Distinguish between narrow AI, general AI, and super AI.

Narrow AI (also known as weak AI)

RCV Academy

- Narrow AI is designed to perform a specific, limited task
- It operates within a predefined context and lacks adaptability beyond its domain
- These are widely used and commercially available nowadays
- Narrow AI Examples:
  - Spam filters
  - Game-playing systems (like chess engines)
  - Voice assistants
  - Generative AI

General AI

RCV Academy

- General AI exhibits human-like cognitive abilities. It can reason, understand, and act across a wide range of situations.
- Some Capabilities of General AI are:
  - Can learn and adapt autonomously
  - Understands complex environments
  - Makes decisions equivalent to human reasoning
- General AI is still theoretical and not yet realized
- Few conceptual Examples of General AI
  -  Universal personal assistant:
    - Understanding your moods, goals, preferences and then adapting its behavior accordingly
  - 

 Creative collaborator:
    - Can have cognitive abilities similar to humans. Can paints original artwork, compose music, write novels with emotional depth
  -  Adaptive robotics:
    - A robot that can switch from cooking dinner to repairing a car, learning each task from scratch and improving over time

Super AI

RCV Academy

- Super AI surpasses human intelligence with access to massive computational resources and knowledge
- It is thought that super AI systems will quickly become wiser than humans
- Represents the point of technological singularity, where AI could evolve beyond our control or understanding and triggers uncontrollable and irreversible changes to civilization
- It is entirely speculative and futuristic at the moment
- Super AI Capabilities:
  - Performs any cognitive task better and faster than humans
  - Might self-improve rapidly, becoming increasingly intelligent

RCV Academy

THANK YOU!!!
